3505	55c	Listed in Scott Stamp Monthly (April 2009) as '3505 sheet of 10.' It is unclear from the listing (and I have yet to see the sheet) which of the stamps includes mushrooms. From the SSM description of the 10 stamps I suspect that the "stew" stamp (3505b) may be the one with the mushroom(s) in it.
------	-----	---

Also per SSM "...issued in large booklets containing panes of 1 of each stamp.."
